<p class="arial">

   <div>
Firstly. I would like to disagree with the review which I found on sikhsha.com but this review really opened my eyes. </div>Let Indus university be your last of last options.

 Placements: 70% of students have placed but not with dream jobs. The highest package offered was 12 lacs per annum. The lowest was 2 lacs per annum. Top recruiting companies are GTPL, TCS etc. There's not much of internship. It's not good at placements so don't keep your hopes high.

 Infrastructure: No AC. It'd be a good campus if the campus was not under construction. Food is great no doubt. The worst medical facilities because the campus is far from city and in emergency it'd take long time to reach the hospital. I have encountered this thing. Had to take my friend on bike. No one knows sports in Indus university, so forget it.

 Faculty: Teachers are good and helpful. But some faculty members are disaster. Teaching quality is very old school. Not much of new methods are practiced. They do make students industry ready and the curriculum is also relevant but one has to study themselves since attendance is not much a compulsion.

 Other: I love computer and thus chose this course.</p>
